Replacement Migration In Canada: 1966 To 1979 Data

Nick Griffin Denounces "Kalergi Plan" At European Parliament
Ensuite, ce fut un «experiment multiraciale». Après, ils étaient des «réfugiés». Puis «la réponse à une

Here's some data going back to the 1960s. These years feature quite differently than more recent reports. The United States and United Kingdom were consistently at the top of the source countries list. That has since been replaced by China, India and the Philippines. White genocide (a.k.a "replacement") is a very real thing.

According to the United Nations, enacting policies designed to bring about the destruction of an ethnic, racial, or religious group (in all or in part), is considered genocide. Consequently, forced multiculturalism and population replacement should be viewed through that lens.

1. Mass LEGAL Immigration In Canada

Despite what many think, ***LEGAL*** immigration into Canada is actually a much larger threat than illegal aliens, given the true scale of the replacement that is happening. What was founded as a European (British) colony is becoming unrecognizable due to forced demographic changes. There are also social, economic, environmental and voting changes to consider. See this Canadian series, and the UN programs for more detail. Politicians, the media, and so-called "experts" have no interest in coming clean on this.

3. More Recent Statistics On Immigration Source Countries

The above may not seem too bad, but keep in mind that the trends are about to get a whole lot worse. Here are numbers from within the last decade. Of course, this doesn't include the hordes of students and "temporary" workers who come and don't leave.

Source: IRCC, Permanent Residents Data as of March 31, 2019.

Notice any major changes? The U.K. and U.S. are nowhere near as prominent as they once were, and the demographic replacement is accelerating.

Of course, this doesn't address the levels of student visas and "temporary" workers, which would increase drastically in the coming years.
